

Scientific Consensus Report

RESEARCH QUERY:

Does metformin improve survival in HER2-positive breast cancer?

1. Executive Consensus & Synthesis

Error calling Consensus Agent: llama-server process has terminated: exit status 0xc0000409: The system detected an overrun of a stack-based buffer in this application. This overrun could potentially allow a malicious user to gain control of this application.: CUDA error: shared object initialization failed
CUDA error

2. Laboratory Protocol Draft

Error calling Experiment Agent: model 'gemma3:4b' not found

3. Cited Evidence & Methodological Quality

[1] WBP2 Attenuates Metformin Response in HER2-Positive Breast Cancer Cells by Repressing AMPK Activation and Inducing a Lower AMP:ATP Ratio State Through Enhanced ATP Production.
